

204 Jordan Hall

Dear Josh :
I appreciate your having
taken this up with Young, and note
to send to you've really done the rounds
of tests - I - ad in mind.
Sincerely, Joe

Jan. 24, 1962

Dr. Richard S. Young, Chief
Environmental Biology
National Aeronautics and Space Administration
Ames Research Center
Moffett Field, California

Dear Dr. Young:

Many thanks for having sent me a list of reports of the investigations of the effects of weightlessness carried out under the auspices of NASA. I am especially interested in the first, second and sixth articles on your list and am herewith writing to Drs. Stone and Letko, requesting that they send me a copy of their article "Weightlessness Simulator" if they have one available. The second and sixth articles, however, listed below, do not have the name of any author and I am therefore glad, in the case of these two items, to take advantage of your kind offer to get reprints for me where possible.

Again with thanks, and in the hope that this and related lines of work carried out by NASA will prove increasingly successful, I remain,

Yours sincerely,

HJM:slh
